BF-chat

preparing

Start time: Oct 2018

2018Q2-2018Q3 System

Information

Block-Fund will become a decentralized, open-ended fund platform based on virtual asset trading. It will include fund formation, fund raising, dividend distribution, share transfer, fund manager rating, and voting on major fund transactions.

Block-Fund

Eth-Exchange will become a virtual currency integrated trading platform based on the Block-Fi Fund. It will supervise fund assets not to be misappropriated and stolen. In order to prevent technological attacks, it will establish an Eth-Investor Protection Fund to deal with the losses caused by technology risks to investors.

Eth-Exchange

BF-wallet will become an independent sub-brand of BF and will provide online wallet services for customers. At the beginning of 2019, BF-Debit Cards (physical cards) will be developed to secure customer assets and start BF-pay simultaneously, providing customers with virtual token payment services.

BF-wallet&BF-pay

BF-chat will be the brand of BF online chat and will establish a completely anonymous online communication platform. It will register and log in based on the customer's account address at BF. It will replace telegram as the BF fund investment exchange and fund investment conference platform.

BF-chat

2018Q2-2018Q3 Community

Data	June, 2018	Sep, 2018
Customer Scale	Start	20,000
Fund Market Value Scale(dollars)	Start	200,000,000
The Number of Fund Companies	Start	10
Community Size(Telegram)	Start	60,000

A complex network diagram with blue nodes and lines on a dark background. The nodes are connected by thin blue lines, forming a web-like structure. The nodes vary in size and are distributed across the frame, with a higher density in the center and right side. The overall shape is somewhat irregular, with some nodes extending towards the left and others towards the right.
